

# Streamlined monitoring

Streamline & simplify lab monitoring to accelerate R&D, improve data integrity & help scientists focus on science

## Shortened R&D timelines

With Lumi, you cut the need to spend time on data capture and get to re-distribute FTEs on more important tasks.

Actionable data insights move the discovery process forward without the need for manual analysis.

United data log & streamlined data exchange significantly shorten cross-team communication and project progress reporting timelines.

Lumi takes care of lab monitoring and data capture, recording everything that happens in the lab and putting it in a log.

Lumi sends the log to a user-driven platform for analysis, providing your team and customers with insights and a real-time glimpse into progress.

It operates 24/7, 365 (or 366) days per year without breaks & capture errors.
